1 INTRODUCTION

1.1 PURPOSE OF THE TEST CASE DOCUMENT

The Test Case document documents the functional requirements of the Report a player test case. The intended audience is the project manager, project team, and testing team. Some portions of this document may on occasion be shared with the client/user and other stakeholder whose input/approval into the testing process is needed.

2 TEST CASE SPECIFICATION

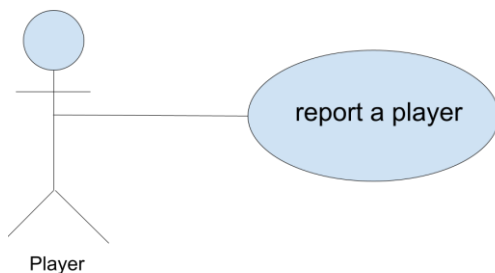

2.1 DESCRIPTION

The purpose of this test case is to identify and communicate conditions that will be implemented in test, reporting a player system requires testing to ensure that the system allows the players to report a disturbing player on the website without any issues, tested by the testing team representing the role of the player actor attempting to report another player

2.2 RESOURCES

The Testers team responsibilities, revolves around identifying each combination of main and alternate flows to help in the process of creating test cases for the report a player use case

association to the test case: play the role of the player reporting another player

2.3 PRECONDITIONS

- The Tester must be logged into the website as a player user (player actor)

2.4 POST CONDITIONS

- The player is reported and is sent an email to inform them about the report being reviewed by administrators
- The admins receive the report made by the player

2.5 FLOW OF EVENTS

Basic Path	1.The player would want to report another player and proceeds to click on the “Report” tab 2.The Website displays the “List of Player” with different players icons, a search bar and a choose the player button 3.The Player searches for the player they want to report and proceeds to click on their profile icon 4.The Player clicks on the choose the player button once he chooses the correct player 5.The website displays the “information about the player” page with information about the player, stats, ranks, names, etc. and a yes and no button under “do you want to report this player?” question 6.The player clicks on the yes button to confirm that he wants to report the other player 7.The website displays the “Reason for report” page which includes the reason field with multiple choices to choose from and a send button 8.The player chooses one of the prompts provided to that fit the reason of them complains 9.The Player clicks on the send button once he chose the correct prompt 10.The website displays “Are you sure you want to report this player” screen to the player to ensure that the player is certain about reporting 11.The player proceeds to click on yes confirming their intention to report the other player 12.The website sends the report to the admins for further investigation and verifications of the reason of report and changes the button of report to reported under the other players profile
Alternative Path	1.Other’s reason In step 7. if the player does not find a prompt that explains his reasoning for the complaint: • The Player chooses the “other” prompts in the reasoning field • The Website displays a page for the player to write their reasoning in • The player beings to write the reasoning of their report in the field and then clicks on confirm report proceeding back to step 9 2.Player cancels report In step 11 if the player changes his mind about sending the report • The player chooses no dismissing the report • The website then proceeds to close the “are you sure you want to report this player” page and dismiss the report all together 3 Player Quits website The player may exit the website at any moment during the use case, The website will save that last thing he wrote in the details/subject text boxes if he chose the others prompt before leaving
